

HUNG TA GARDEN ENTERPRISE CO., LTD.

Tel: 886-49-2528280

Fax: 886-49-2521619

Website: www.aquahung.com

Model: Heavy Duty garden hose

Features:

- ◆ Kink Free.
- ◆ Provides an uninterrupted flow.
- ◆ Durable Design: Resist leaks, abrasion, puncture.
- ◆ Lead Free Safe drinking water.
- ◆ Improved complex inner tube prevents kinking.
- ◆ Temperature & UV Resistant.
- ◆ Durable wear equal to commercial grade hoses.

Function:

Easy for storage.

Suggested working water pressure at : 5Bar (70psi) ~10Bar (150psi)

Instant burst pressure at 17.5Bar(250psi) for **plastic quick connector** /
27.5Bar(400psi) for **Male/Female connector**

Gardena G18431-15 Standard

Gardena heavy duty garden hose with kink problem.

VS

Hung Ta Heavy Duty Garden hose without kink problem. The water can keep flowing when garden hose get kinked.

Lightweight & easy for storage : 58% light weight compared to Gardena hose. (i.e. 50ft/15m)

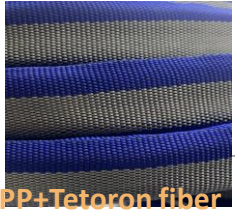

VS

◆Durable design of raw materials

1.High-strength flat woven fabric, abrasion resistant

Material :

- ◆ High-strength PP(Polypropylene)+polyester fiber weaving (Tetoron polyester fiber)
- ◆ High-strength polyester fiber weaving (Tetoron polyester fiber)

Features :

- ◆ Anti-UV 300 hours
- ◆ Compliance with EU non-toxic inspection standards
- ◆ Compliance California Proposition 65 (CA Prop 65)

◆Integrated explosion-proof inner tube with heat-resistant material :

With high strength woven fabric tube, which can withstand 3Bar-10Bar(40psi–100psi) water pressure without burst.

Material :

- ◆Rubber composite material

Features :

- ◆ Heat resistant up to 80°C
- ◆ Cold resistant -60°C
- ◆ Compliance with EU non-toxic inspection standards
- ◆ Compliance California Proposition 65/CA Prop 65
- ◆ Inner tube can keep soft under 0°C temperature without freeze. The hose will enlarge and extendable withstand 70PSI water pressure.

SWOT analysis

STRENGTHS

1. Withstand water pressure 5-17Bar and temperature +80°C~-60°C
2. Kink Free. Inner tube with patent ribs design prevents kinking.
3. Easy to store and Easy to maneuver.
4. Inner tube with ECO material, passed heavy metal regulation, RoHS and REACH – SVHC is acceptable for gardening.

WEAKNESSES

1. High quality inner tube with higher cost.

SWOT

OPPORTUNITIES

1. Long-Life cycle testing
2. Patent designed inner tube can not be insteaded.
3. Our garden hose will keep softable and flexibale without freeze when storing under 0 temperature.

THREATS

1. High price with high quality hose cause not easy to spread for the world.
2. Suitable for homeuse marketing only.

Innovative Garden Hose

A. The innovative hose will solve the problem of hardening and freezing cracks when you use water pipes in extremely cold weather!

B. Innovative hose will change the traditional water pipes that will freeze, harden and be difficult to use when it is cold. Our products will be the best products for you to use all year round.

C. Extreme cold savior! Best garden hose don't get hard in all-season.
